PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building web applications using Node.js, TypeScript, Next.js, and MongoDB. I recently completed a backend engineering internship at SkyeStudio, where I contributed to security improvements, bug fixes, and infrastructure optimization. Passionate about writing clean, well-documented code, solving real-world problems, and continuously validating my skills through structured, project-based curricula.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, Node.js, Express.js (v5), Next.js (App Router), React (v19)
- **Databases & Caching:** MongoDB, Mongoose ODM, Redis (Upstash), Data Modeling, Basic Query Optimization
- **Authentication & Security:** JWT, NextAuth.js, TOTP (RFC 6238), bcrypt, Role-Based Access Control, API Rate Limiting
- **Tools & DevOps:** Git, GitHub, GitHub Actions (Basic CI/CD), Vite, Vercel, Render, ESLint, Prettier
- **APIs & Integrations:** RESTful API Design, Postman, Swagger UI, OpenAI API, Cloudinary.

PROFESSIONAL EXPERIENCE

AI Agent Marketplace Platform | Multi-Tenant Application | 2026

Context: Contributed to a platform enabling businesses to deploy AI agents trained on custom knowledge bases.

Key Contributions:

- **Security Improvement:** Patched a JWT timing-attack vulnerability using `crypto.timingSafeEqual()`, helping to reduce the risk of token forgery across tenant environments.
- **Authentication Update:** Updated the Time-based One-Time Password (TOTP) implementation to comply with RFC 6238, ensuring compatibility with standard apps like Google Authenticator.
- **Infrastructure Optimization:** Implemented an in-process worker fallback for BullMQ, allowing background tasks to run efficiently on Render without needing dedicated, costly worker instances.
- **Bug Resolution:** Debugged and resolved a MongoDB query collision that was causing incorrect password validations, restoring reliable authentication for users.
- **CI/CD Maintenance:** Helped stabilize the deployment pipeline by resolving ESLint and Prettier configuration conflicts, enabling smoother automated deployments.
- **Documentation:** Wrote clear documentation for new features, bug fixes, and development workflows to help improve team collaboration.

FULLSTACK PROJECTS

1. PropertyPulse | Next.js, TypeScript, MongoDB, NextAuth.js

Live Demo: <https://property-pulse-phi-vert.vercel.app> | GitHub: <https://github.com/tobajetex/property-pulse>

- Built a full-stack real estate platform with 12+ dynamic routes using Next.js App Router and TypeScript to ensure type safety.
- Implemented Google OAuth authentication using NextAuth.js and protected specific routes using middleware.
- Added ownership-based checks in Next.js Server Actions to ensure users can only edit or delete their own property listings.
- Integrated Cloudinary for multi-image property uploads and Mapbox for interactive location maps with address geocoding.
- Set up a basic GitHub Actions workflow for linting and type-checking, with automated deployments to Vercel on every push to main.

2. Thinkboard | Node.js (Express 5), React 19, MongoDB, Upstash Redis

Live Demo: <https://frontend-eta-pearl-95.vercel.app> | **GitHub:** <https://github.com/tobajetex/Thinkboard>

- Developed a full-stack note-taking application featuring a clean separation between a React/Vite frontend and a Node.js/Express 5 backend.
- Implemented RESTful API endpoints for full CRUD operations, utilizing MongoDB and Mongoose for data persistence and automatic timestamping.
- Integrated Upstash Redis and Upstash Ratelimit to protect API endpoints from abuse and effectively manage request rates.
- Designed a responsive user interface using Tailwind CSS and DaisyUI, incorporating react-hot-toast for real-time user feedback.
- Structured the backend using a modular pattern (controllers, routes, models, middleware) to ensure maintainable and organized code.

CERTIFICATIONS

- **Full-Stack Developer Career Path**
Credential Link: [\[view\]](#)
- **Frontend Developer Career Path**
Credential Link: [\[view\]](#)
- **Advanced React Certificate**
